## OUR FUND TO INVEST IN OUR PLANET

We strongly believe in travel as a force of good. However, there is an elephant in the room: tourism is accountable for roughly 8% of the world's carbon emissions. These emissions come with a responsibility which Pelorus is committed to consciously addressing.

Created by Pelorus Foundation, The Climate Investment Fund partners with some of the world's leading carbon removal solutions: technology driven blue carbon, forest carbon and soil carbon, to compensate for travel emissions, calculated using Greenly's bespoke carbon accounting platform. The Fund creates sustainable partnerships with projects on the ground, supporting front line communities and investing in the technology pioneering carbon removal.
